SWEDISH

Swedish Cancer Conference Series

January to December 2013

Series Goal

The series will provide a forum for case presentations and discussions of protocols/care pathways and technology-related issues in the care of patients with cancer. These forums will include prospective case discussions and no more than 25% didactic presentations.

Series Objectives

At the conclusion of these sessions, the participant will be able to:

- Describe the treatment options following national guidelines for various cancers which are commonly seen at Swedish Hospital, including breast, genitourinary, gynecologic, thoracic, gastrointestinal, hematologic, head and neck, neurologic and soft tissue
- Implement the protocols related to new research in cancer treatment
- Compare the outcomes of patient responses to treatment and to discuss cost-effectiveness of care
- Participate in multidisciplinary cancer teams at Swedish Medical Center
- Compare and contrast technological options
- Discuss the histopathologic classification of various cancers and appropriate TNM staging.
- Participate in developing guidelines for patient care in selecting radiation therapy, surgery, or other disease management techniques
- Coordinate the evaluation, counseling and management of patients and families at risk for hereditary cancers
- Improve awareness of appropriate research treatment protocols available and Swedish Hospital

Target Audience

These conferences are designed for all specialties of physicians and multidisciplinary team members who care for patients with cancer, including Physicians, Physician Assistants, Oncology Nurses, Radiation Therapists, and Clinical Research Staff.

Evaluation and Outcomes

Participants will complete evaluations in order to ensure that programs are meeting the needs of participants. Guest speakers will be arranged when discussion leads to the identification of special topics or research advances.

The impact of this series will be measured by the satisfaction of participants, consensus development of clinical guidelines, and analysis of trends of patient accrual for pertinent clinical trials.

Needs Assessment

The need for this series of educational offerings was determined by:

- Swedish Medical Center Cancer Committee and current ACOS Commission on Cancer Program standards
- Questions raised by referring physicians
- Recent literature reviews of new protocols and findings
- Recommendations by medical and clinical staff
