## **Fighting breast cancer from its earliest stages.**

Washington state has one of the highest rates of breast cancer in the nation, and at Swedish we take this statistic very seriously. That's why when we sat down to design an all-new breast imaging center, we did so with the clear intention of providing our patients with imaging technologies that can help identify breast cancer in its earliest, and most curable stages.

## **All the best technologies — in one place.**

This all-new center — now called the Swedish Breast Imaging Center at First Hill — brings together three existing Swedish breast centers: the Women's Diagnostic Imaging Center (WDIC), the Swedish Breast Care Center (SBCC), and the Comprehensive Breast Care Center/Cherry Hill. This unification of people and specialties enables us to create a single, technologically advanced imaging facility that offers you the best of all worlds: improved efficiency, better care and the latest screening and diagnostic capabilities — all under one roof.

## **Same-day imaging results, extended hours and convenient parking.**

Here, in our expanded location at 1101 Madison, Suite 310, you'll find exactly what you need to support your breast health, including same-day results. If you're interested in same-day results, be sure to tell the scheduler when booking your

appointment — that way your appointment will be automatically extended to include the extra time necessary. Otherwise your results will be mailed to you as they normally would.

In addition to same-day results, we've also made some changes that will impact your time and your health in important ways:

- Extended hours
- Improved access to appointments
- Upgraded facilities
- Convenient parking
- And best of all, future access to the very latest technologies

## **Precision breast imaging you can rely on.**

Who performs your breast imaging — and who reads it — matters. Not only for your health, but for your peace of mind. The Swedish Breast Imaging Center at First Hill is designated a Breast Imaging Center of Excellence by the American College of Radiology (ACR). By awarding facilities this status, the ACR recognizes breast imaging centers that have earned accreditation in all of the College's voluntary, breast-imaging accreditation programs and modules, in addition to the mandatory Mammography Accreditation Program. We look forward to providing you with efficient, accurate and considerate breast imaging care.
