

Conveniently located one block from Swedish Medical Center in Seattle's First Hill neighborhood, Swedish Family Medicine can provide you and your family with all the care you need, all in one place.

Our team of health-care providers includes resident physicians from the best medical schools in the country as well as faculty members from the Swedish Family Medicine Program. Resident physicians serve a three-year commitment to our clinic, while faculty members and nurses are a permanent part of the team. All are dedicated to providing the highest quality medical care to their patients — from newborns through young adults to senior citizens.

What our patients have to say when asked, “What do you like best about our clinic?”

“It’s great — awesome care and quick.”

“This is a good, caring staff.”

“My doctor’s care and the help that I get here. Plus, the rest of the staff is very helpful.”

“The prompt service and good communication skills.”

“The staff is friendly and I feel that I’m getting good care.”

“The front office staff is very friendly. I like that I was able to get right in.”

Complete Care
For You
And Your Family

Our range of services includes:

- Same-day appointments for minor injuries and illness
- Routine checkups and screenings for specific health concerns
- Immunizations
- Management of chronic illness or conditions
- Gynecology and obstetrics (OB/GYN) care
- A wide range of skin care (dermatology), from removal of skin tags and warts to biopsies to Botox injections
- Mental health services, including substance abuse and eating-disorders counseling
- Many outpatient surgical procedures, including vasectomy and circumcision
- Coordination of at-home or nursing-home care as needed
- Referrals to specialists for serious illnesses such as cancer or heart disease
- Hospitalization at Swedish Medical Center if needed

What makes us different

Family physicians care for patients of all ages — from the newly born to those enjoying their senior years.

Our physicians get to know patients and families in a way that's not always possible in specialized medical practices. They're able to spot subtle changes in a patient's health and act to prevent or delay the onset of serious illnesses such as a heart disease, diabetes and cancer. When serious conditions do develop, we're able to refer patients to a network of specialists who provide exceptional care.

For most health-care concerns, however, a visit to Swedish Family Medicine is all that's needed to resolve the issue.

We are particularly good at providing assistance, support and services in the following areas:

Family Planning and Childbirth Services

We can help with birth control and family planning decisions as well as provide complete care through pregnancy and beyond. When the time is right, our patients give birth at Swedish Medical Center and enjoy exceptional nursing care delivered in state-of-the-art birthing suites.

Toddlers, Teens and Tweens

Our care for babies and small children includes well-baby checkups and immunizations. And as they grow, we provide the full range of care, from treating physical illnesses to skin problems to mental-health issues.

Adult and Geriatric Care

As our patients age, we adjust their care to include continuous health-risk assessments and screening for such conditions as prostate and colon cancer. Our mental-health services for adults of all ages include couples counseling treatment for such issues as depression and substance abuse.

We are especially proud of our success in helping older patients stay well and independent as long as possible. An important service we offer is the coordination of care of all the specialists involved in a patient's care.

Our geriatric team includes physicians, a physician assistant, registered nurse, medical assistant, social worker, psychologist, pharmacist and patient service representative. All strive to honor each patient's values and beliefs in every decision made about that person's care.

One patient described our geriatric team as "caring, respectful, fresh, responsible, compassionate." We promise to be all that and more.

Make your appointment today

You don't need to wait for injury or illness to see one of our physicians. We can schedule a checkup or health screening at any time.

Today is the best day to begin taking care of your health. Call today and find out how we can help.
