

Swedish Referral Services

One-Stop Referral Assistance for Providers

Swedish Referral Services offers clinical practices throughout the Pacific Northwest, neighboring states and even other countries a single point of contact to help transition patients to the appropriate specialty care offered by Swedish and our health partners. Our **Provider Referral Services** program is designed to reduce confusion, ease the way for your patient and save you and your staff valuable time. We facilitate the entire referral process, including:

- Transfer of patient information to and from the referring practice, and to other health professionals as needed to ensure continuity of care
- Back-to-back coordination of appointments for your patients
- Reduced scheduling delays for office appointments
- Free interpreter services with advance notice
- Useful resources for patients and their families such as transportation information, maps and directions, and area accommodations

Referring providers may request a particular specialist at the time of referral, or the Swedish triage team can evaluate the patient's medical information and forward the referral to the appropriate clinic or physician. Either way, we maintain an open communication link to keep you updated.

Using Swedish Referral Services

Let us help you find the most appropriate specialty care for your patients.

- **Secure eFax:** 206-320-2655
- **Phone:** 425-525-6108
