- Social services

**NF2 CLINICAL SERVICES**
Specialists on the NF2 Team
- Audiology
- Genetics
- Medical oncology
- Neurology
- Neuro-oncology
- Neuro-ophthalmology
- Neuropathology
- Neuroradiology
- Neurosurgery
- Neurotology
- Radiation oncology
- Research coordination
- Social services

**Scheduling a visit to the Swedish Neurofibromatosis Center (SNC)**
SNC clinics are held on Tuesdays, although patients can be seen any day according to need. Initial and follow-up visits for most patients will be with Dr. John Henson, with additional specialty visits planned as needed.

Most of the patients in the SNC are age 18 years and older, but some younger individuals are seen as well.

Patients with other tumor genetic syndromes, including von Hippel-Lindau, tuberous sclerosis, Sturge-Weber, Turcot’s and Cowden’s, are also seen in the SNC.

**John W. Henson, M.D.**
Director, Swedish Neurofibromatosis Center
Office: 206-320-2300
